About Me

I am Full-Stack Software Engineer who is experienced in programming software, giving technical support, and troubleshooting governmental information technology systems. Have knowledge about C#, ASP.NET Core, Blazor, Restful APIs and SQL Server programming and have the experience to give technical support in the Online Land Settlement and Survey Management System such as settlement.gov.bd. Skilled in investigating system problems and giving technical support and training to users of database-driven systems. Always want to utilize my software development skills.

Education

Bachelor of Science (BS) — *2022 – 2026*
Daffodil International University — *Grade: 3.27 / 4.00*

Higher Secondary School Certificate (HSC) — *2019 – 2021*
Government Hazi Jamal Uddin Degree & Honours College — *Grade: 4.61 / 5.00*

Secondary School Certificate (SSC) — *2019*
Haybatpur M.L High School And College — *Grade: 4.50 / 5.00*

Skills

Technical Skills:

- **Programming Languages** – C#, SQL, HTML5, CSS3, PHP
- **Framework**–.NET8Blazor, ASP.NETCoreMVC/WebAPI,MudBlazor, EntityFramework,ADO.NET, WPF, RDLC, Laravel, Bootstrap, jQuery
- **Databases** – SQL Server, MySQL (Stored Procedures, Query Optimization)
- **Architecture** – Component-Based, Repository Pattern
- **Tools** – IIS, Git, Visual Studio, Postman, VScode.
- **ERP & Support** – ERP Implementation, Deployment, Incident Management (L1–L2), Production Monitoring.

Soft Skills :

- **Communication** – Clear verbal and written communication with team members and clients.
- **Teamwork** – Collaborating effectively in group projects and professional environments.
- **Time Management** – Managing deadlines, task prioritization, and productivity improvement.
- **Training & User Education** – Helping users understand systems, software, and technical processes.
- **Customer Service** – Providing support, solving user problems, and maintaining professional relationships.

Languages: Bangla, English

Projects

Online Land Records and Survey Management System

- Digitized land records, Khatian search, and ownership verification with GIS map integration.
- Built with WPF, .NET, and MS SQL Server.
- Supported system users in resolving operational issues and using system features effectively.

settlement.gov.bd

- Contributed to digital land settlement services, including Khatian search and online payment integration.
- Built with ASP.NET Core MVC, JavaScript, and MS SQL Server.

Personal Information Management System (PIMS)

- Developed employee management modules with role-based access control and secure authentication.
- Built with Blazor Server/WebAssembly, REST APIs, and SQL Server.

Expertices

Intern

Pirthe Limited | April 2026 – August 2026

- Assisted with .NET project development and related technical activities.
- Supported project operations and helped resolve technical challenges.

Junior Software Engineer

Pirthe Limited | September 2026 – Present

- Contribute to the development and maintenance of two .NET projects, including UI enhancements and user experience improvements.
- Assist with database design and implementation to improve data management and storage.
- Provide client support and technical assistance for the Establishment of Digital Land Management System.
- Troubleshoot reported issues and guide clients in using system features effectively.

Achievements

· Prompt Battle – Prompt Engineering Contest, Summer 2025 *August 25, 2025*
Showcasing advanced creativity and skills in AI prompt engineering and problem-solving.

· AWS Academy Graduate – AWS Academy Machine Learning *August 03, 2025*
Gaining hands-on knowledge in machine learning concepts and AWS cloud-based AI solutions.

· Thinking in Object Oriented Programming: Basic Concept *July 4, 2024*
Building a strong foundation in object-oriented programming principles and software design concepts.
